

CAPABILITY STATEMENT

ABOUT US

TECHNICAL DESIGN EXPERTISE

We design cost-effective systems that comply with Australian Standards and are customised to your requirements.

30+ YEARS OF EXPERIENCE

With over 30+ years of experience, we know what works (and what doesn't) so you have peace of mind that your building systems and equipment are safe, compliant and durable.

PROMPT TECHNICAL SUPPORT & TRAINING

We provide prompt technical support and training to keep your systems running smoothly. Whether you need troubleshooting assistance, product guidance, or hands-on training, our expert team is ready to help.

100% AUSTRALIAN OWNED

At Perimeter Systems Australia, we take pride in being a 100% Australian-owned company, delivering high-quality security and perimeter solutions designed for local conditions.

OUR COMMITMENT

Perimeter Systems Australia specialises in **Perimeter Intrusion Detection Systems (PIDS)**, delivering advanced security solutions for critical infrastructure. With over **30 years of experience**, we provide cutting-edge technology, including fence-mounted sensors, fiber optic solutions, buried cable systems, microwave barriers, thermal and optical imaging, ensuring reliable and tailored total perimeter protection.

BRANDS WE WORK WITH

CASE STUDIES

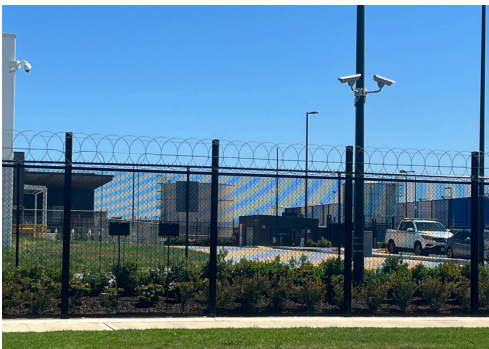

CORRECTIONAL FACILITIES

The Intrepid Micropoint II system and Microwaves has been successfully installed across multiple correctional facilities throughout Australia, enhancing perimeter security with its advanced intrusion detection capabilities

TRAIN YARDS

The Intrepid Micropoint II system secures Queensland Rail's stabling yards and feeder stations, integrating with CCTV and alarms to address rail-specific security challenges and prevent unauthorized access.

DATA CENTRES

The Intrepid Micropoint II and Micropoint POE systems has been strategically installed across various high-profile data centres in Australia to provide advanced perimeter security and protect critical digital infrastructure

POWER STATIONS

The Intrepid Micropoint II system has been installed across various Energex sites to enhance perimeter security and protect critical energy infrastructure. The system's advanced signal processing minimizes false alarms while providing real-time threat detection, helping to safeguard essential power distribution assets.
